March 16, 2015

The Honorable Jocelyn Boyd Chief Clerk of the Commission Public Service Commission of South Carolina Post Office Drawer 11649 Columbia, South Carolina 29211

Re:

AT&T South Carolina's Petition Requesting the Commission's Intervention in Numbering Resources Determinations Allendale Rate Center –University of South Carolina Salkehatchie Docket No.

Dear Ms. Boyd:

BellSouth Telecommunications, LLC d/b/a AT&T South Carolina ("AT&T South Carolina") respectfully encloses for filing a Petition for Review of Numbering Resources Determination in the Allendale Rate Center in the above-captioned matter. In summary:

AT&T South Carolina submitted an NXX Assignment Request via the Pooling Administration System on February 20, 2015;

AT&T South Carolina's customer requesting numbering resources is University of South Carolina Salkehatchie

AT&T South Carolina requested a thousands block in the Allendale exchange;

The request impacts the Allendale rate center;

At the time of the request, the Allendale Rate Center had a "months to exhaust" ("MTE") of 5728.363 months for the relevant block

At the time of the request, the Allendale Rate Center had a utilization of 32.686%.

By copy of this letter, I am serving a copy of this document on all parties of record as indicated on the attached Certificate of Service.

Sincerely,

Patrick W. Turner

BEFORE THE PUBLIC SERVICE COMMISSION OF SOUTH CAROLINA

In Re:	AT&T SOUTH CAROLINA'S	
	PETITION REQUESTING THE COMMISSION'S	
	INTERVENTION IN NUMBERING RESOURCES)
	DETERMINATIONS	ĺ
		í

PETITION FOR REVIEW OF NUMBERING RESOURCES DETERMINATION IN THE ALLENDALE RATE CENTER

BellSouth Telecommunications, LLC d/b/a AT&T South Carolina ("AT&T South Carolina"), pursuant to rules adopted by the Federal Communications Commission ("FCC") for challenging numbering determinations, petitions the Public Service Commission of South Carolina ("Commission") for review of a recent denial of AT&T South Carolina's application for use of numbering resources in the 803 area code. Numbering determinations are made by the North American Numbering Plan Administrator ("NANPA") and/or the Pooling Administrator ("PA"), depending on the nature of the numbering request. The FCC's rules addressing these matters, however, generalize responsibilities of the NANPA and the PA under the heading "Central office code administration," and the FCC's Orders addressing these matters allow for challenges of determinations by both entities. Accordingly, this Petition addresses the determination described herein and asks the Commission to direct NANPA and/or the PA to provide the requested relief to the extent it is within the respective authority and responsibility of

See, e.g., 47 C.F.R. §52.15.

NANPA and/or the PA to do so. The denial that is the subject of this Petition impacts AT&T South Carolina customer University of South Carolina Salkehatchie.

In support of this Petition, AT&T South Carolina states:

- 1. AT&T South Carolina is a telephone utility that provides, among other things, intraLATA, local exchange telecommunications services in various portions of South Carolina, including the Allendale exchange.
- 2. NANPA is an independent non-governmental entity that is responsible for administering and managing the North American Numbering Plan ("NANP").³
- 3. The PA is an independent non-governmental entity that is responsible for administering thousands-block number pooling.⁴
- 4. On March 31, 2000, the FCC issued an Order relating to numbering resource optimization.⁵ The goal of the *First NRO Order* was to implement uniform standards governing requests for telephone numbering resources in order to increase efficiency in the use of existing telephone numbers and to avoid further exhaustion of existing numbers.
- 5. Among other things, the FCC required that, to qualify for access to new numbering resources, applicants must establish that existing inventory within the applicant's rate center will be exhausted within six months of the application. The FCC reaffirmed this

See Third Report and Order and Second Order on Reconsideration in CC Docket No. 96-98 and CC Docket No. 99-200, Numbering Resource Optimization; etc., 17 FCC Red 252, ¶61 (2001) ("Third NRO Order").

See 47 C.F.R. § 52.13 (a), (b).

See 47 C.F.R. §52.7(g). See also 47 C.F.R. §52.20 ("Thousands-block number pooling is the process by which the 10,000 numbers in a central office code (NXX) are separated into ten sequential blocks of 1,000 numbers each (thousands-blocks), and allocated separately within a rate center.").

requirement in two subsequent orders.⁶ Prior to this ruling, the Central Office Code Assignment Guidelines used to make code assignments required the applicant's existing number inventory within the applicant's serving switch to exhaust within six months of the code application or the carrier had to prove that it was unable to meet a specific customer's request with its current inventory of numbers in order for a code to be assigned.

- 6. In addition to the months-to-exhaust ("MTE") requirement described above, the FCC's rules also required carriers to meet a rate center utilization threshold of 60 percent in order to receive additional numbering resources in a given rate center. The utilization threshold has increased by five percent per year, and it has now reached the maximum of 75 percent. Based on the FCC's orders, carriers must meet both the six months MTE requirement and the utilization threshold on a rate center basis in order to obtain numbering resources. 8
- 7. On or about February 20, 2015, AT&T South Carolina submitted a Pooling Administration System request for the assignment of one thousands-block in the Allendale exchange to go with its customer's existing dialing plan. In order to meet the customer's express request for numbers, AT&T South Carolina requested the assignment of one thousands-block in

See Report and Order and Further Notice of Proposed Rule Making, Numbering Resources Optimization, 15 FCC Red 7574 (2000) ("First NRO Order").

See Second Report and Order, Order on Reconsideration in CC Docket No. 96-98 and CC Docket No. 99-200, and Second Further Notice of Proposed Rulemaking in CC Docket No. 99-200, Numbering Resource Optimization, 16 FCC Rcd 306 at ¶29 (2000) ("Second NRO Order"); Third NRO Order at ¶48-49.

See Second NRO Order at ¶22; Third NRO Order at ¶¶50-52.

Third NRO Order at \P 50-52.

See Exhibit A to this Petition.

the Allendale exchange. As AT&T South Carolina does not have the existing numbers to meet the customer's request, AT&T South Carolina is requesting that the numbers be assigned to it.

- 8. AT&T South Carolina's application was completed in accordance with Industry Numbering Committee ("INC") guidelines, and AT&T South Carolina filled out the necessary Month-to-Exhaust Certification Worksheets as required.
- 9. At the time of the filing of the numbering resource request, the Allendale Rate Center had a MTE of 5728.363 months for the relevant block, and a utilization of 32.686%.¹¹
- 10. Thereafter, also on February 20, 2015, AT&T South Carolina's request was denied because AT&T South Carolina had not met the MTE and/or Utilization criterion now set forth in the INC Guidelines. AT&T South Carolina's numbering resource requests were denied despite the fact that AT&T South Carolina does not have adequate numbering resources needed to satisfy this customer's demands in the Allendale Rate Center.
- 11. AT&T South Carolina's inability to provide this important customer with the requested numbering resources prevents AT&T South Carolina from providing the quality of service this customer desires, needs, and expects. If AT&T South Carolina is not assigned the numbering resources needed to meet the customer's request, AT&T South Carolina will be unable to provide telecommunications services requested by its customer. The refusal to grant numbering resources sufficient to meet the needs of this customer is inconsistent with the FCC's position that "(u)nder no circumstances should consumers be precluded from receiving

See Exhibit B to this Petition.

See Id.

See Id.

telecommunications services of their choice from providers of their choice for want of numbering resources." ¹³

- 12. Both the FCC's rules and the INC Guidelines provide that state regulatory authorities have the power and authority to review a decision to deny a request for numbering resources.¹⁴
- applicable MTE procedures permitted a carrier to receive a code assignment, even if the MTE requirement at the switch level was not met. These waivers or exceptions were granted where customer hardships could be demonstrated or where the service provider's inventory did not have a block of sequential numbers large enough to meet the customer's specific request. Under today's procedures, numbering determinations are based on the MTE for the entire rate center without any exceptions. The FCC has determined, however, that States may grant relief "if a carrier demonstrates that it has received a customer request for numbering resources in a given rate center that it cannot meet with its current inventory." In addition, the FCC has ruled that, "States...may grant requests for customers seeking contiguous block of numbers."

Second NRO Order at \P 61.

See Third NRO Order, Appendix A, Final Rules, § 52.15(g) (4) ("The carrier may challenge the NANPA's decision to the appropriate state regulatory commission"); Third NRO Order at ¶¶ 61-66; Central Office Code (NXX) Assignment Guidelines, INC 95-407-009,§ 13.0 (rev. April 26, 1999)(CO Code Guidelines) ("Appeals may include but are not limited to one or more of the following options: . . . C. The CO Code Administrator(s) and code holders/applicants may pursue the disagreement with the appropriate governmental/regulatory body").

Third NRO Order at \P 64.

¹⁶ *Id*.

14. AT&T South Carolina requests that the Commission reverse the decision to withhold numbering resources from AT&T South Carolina because that decision interferes with AT&T South Carolina's ability to provide telecommunication services to its customers.

15. This Commission (see Docket No. 2002 –185-C, Order No. 2002-415) and other state regulatory agencies in Alabama, Florida, Georgia, Louisiana, North Carolina, and Tennessee similarly have recognized their jurisdiction and authority to review numbering denials and to order the release of number resources to AT&T South Carolina to meet customer needs.

WHEREFORE, AT&T South Carolina requests that the Commission:

A. Reverse the decision to deny AT&T South Carolina's request for additional numbering resources;

B. Direct NANPA and/or the PA (to the extent it is within the respective authority and responsibility of NANPA and/or the PA to do so) to provide one thousands-block in the Allendale exchange; and

C. Grant the requested relief as soon as possible.

Respectfully submitted this 16th day of March, 2015.

Patrick W. Turner

Re: RDS Tracking # 12151488857712TD AT&T Club Account: 803-584-3446 278

Mr. Davis, Jr:

The USC — Salkehatchie campus is the process of preparing for a new phone switch in which we will change our voice infrastructure to a PRI that will include DIDs. AT&T has confirmed that they do not have 300 sequential numbers within the 803-584 exchange (Allendale, SC). Therefore, I am requesting AT&T to open a new prefix for Allendale, SC. I would like the new number to start with 803-XXX-7255 and end in 803-XXX-7555.

If you should need any additional information from me in order to start this process, please don't hesitate to call me at $803-584-3446 \times 101$.

Thank you,

Free ANOW Gayle S. Walsh

Director, Information Technology

Instructions for filling out each Section of the Part 1A form:

Section 1.1 Contact information requires that Service Providers supply under "Block Applicant" the company name, company headquarters address, a contact within the company, an address where the contact person may be reached, in addition to the correct phone, fax, and e-mail address. The Pooling Administrator section also requires the Service Provider to fill in the Pooling Administrator's name, address, phone, fax and e-mail.

Section 1.2 Service Providers who need a thousands-block assignment or for an Location Routing Number (LRN) are required to fill in this section. If needed for an LRN, a CO Code Application needs to also be submitted to the PA. The Service Provider should supply the Numbering Plan Area (NPA); the Local Access Transport Area (LATA), which is a three-digit number that can be found in the iconectivTM LERGTM Routing Guide. The Operating Company Number (OCN) assigned to the service provider and the OCN its parent company. An OCN is a four-character alphanumeric assigned by iconectiv Telecom Routing Administration (TRA). In addition, the number of thousands-blocks requested should be supplied. The Switch Identification as well as the city or wire center name, rate center, rate center sub zone, homing tandem and CLLITM tandem of the facilities based provider xi. Explanations of these terms may be found in the footnotes.

Section 1.3 The date the Service Provider completes the application should be entered in this section, as well as the Effective Date of the requested thousands-block.

Section 1.4 Service Providers should indicate their type, e.g., local exchange carrier, competitive local exchange carrier, interexchange carrier, CMRS. The also indicate the primary type of business in which the numbering resource is to be used. Service Providers also may indicate their preference for a particular thousands-block, e.g., 321-9XXX, or indicate any thousands-blocks that may be undesirable, e.g., 321-6XXX.

Section 1.5 Service Providers indicate the type of request. Initial requests are for first applications for thousands-blocks in a rate center, growth for additional thousands-blocks in a rate center in which the applicant already has numbering resources, and provide the required evidence as ordered by the FCC.

Section 1.6 Service Providers must indicate the updated/current information in regards to contaminated TNs on the block they are returning to the pool. Blocks with over 10% contamination (101 TNs or more) shall not be returned to the pool unless they meet criteria outlined in section 9.1.2 of these Guidelines.

If the block being returned is over 10% contaminated the PA shall seek a new block holder. If question c and/or d have a response of No, the request for return shall be denied.

The thousands-block applicant certifies veracity of this form by signing their name, and providing their title and date.

Footnotes:

- ildentify the type of change(s) in Section 1.5.
- ii The Pool Administrator is available to assist in completing these forms.
- iii A CO Code application will also need to be submitted to the PA.
- ^{iv} Operating Company Number (OCN) assignments must uniquely identify the applicant. Relative to CO Code assignments, NECA-assigned Company Codes may be used as OCNs. Companies with no prior CO Code or Company Code assignments should contact NECA (800 524-1020) to be assigned a Company Code(s). Since multiple OCNs and/or Company Codes may be associated with a given company, companies with prior assignments should direct questions regarding appropriate OCN usage to (TRA) (732-699-6700).
- ^v This is an eleven-character descriptor of the switch provided by the owning entity for the purpose of routing calls. This is the 11 character CLLITM code of the switch /POI.
- vi Rate Center name must be a tariffed Rate Center.
- vii Acknowledgment and indication of disposition of this application will be provided to applicant within seven calendar days from the date of receipt of this application. An incomplete form may result in delays in processing this request.
- viii Please ensure that the NPA-NXX of the LRN to be associated with this block (s) is/will be active in the PSTN prior to the effective date of the block(s).
- ix Select if you are the current Block Holder.
- x Select if you are not the current Block Holder
